

Web of Science Core Collection

Reference Guide

What is Web of Science Core Collection?

Search the top journals, conference proceedings, and books in the sciences, social sciences, and arts and humanities to find the high-quality research most relevant to your area of interest. Using linked cited references, explore the subject connections between articles that are established by the expert researchers working in your field.

Your Web of Science Profile

The image shows a screenshot of the Web of Science Core Collection homepage. The header includes the Clarivate logo, language selection (English), and a Products menu. The main navigation bar contains links for Search, Marked List, History, and Alerts, along with Sign In and Register buttons. The main content area features a large purple banner with the text "Discover multidisciplinary content from the world's most trusted global citation database." Below this is a search interface with a dropdown menu set to "Web of Science Core Collection". The search results are categorized into DOCUMENTS, AUTHORS, and CITED REFERENCES. A search input field contains the example text "Example: liver disease india singh". There are buttons for "+ ADD ROW", "Advanced Search", "X CLEAR", and "SEARCH".

Below the search interface, a "Sign In" modal is displayed. It includes a close button (X) in the top right corner. The modal contains the following fields and options:

- Sign In** (modal title)
- Email Address** (input field)
- Password** (input field)
- ☐ Remember me on this computer
- Sign In** (button)

Two blue lines with circular endpoints highlight the "Register" button in the top navigation bar and the "Sign In" button in the modal.

Create a profile in order to:

- Save records to EndNote online
- Integrate with Publons
- Claim your Author Records and provide author feedback
- Save search histories and alerts
- Save your custom search settings
- Save Marked Lists

1 Psychological comorbidity in gastrointestinal diseases: Update on the brain-gut-microbiome axis
Person, H and Keefer, L
Apr 20 2021 | Progress in Neuro-psychopharmacology & Biological Psychiatry
The high comorbidity of psychological disorders in both functional and organic gastrointestinal diseases suggests the intricate and complex link between the brain and the gut. Termed the brain-gut axis, this bidirectional communication between the central nervous system and enteric nervous system relies on immune, endocrine, neural, and metabol ... [Show more](#)

2 Gut microbiota-derived vitamins - underrated powers of a multipotent ally in psychiatric health and disease
Budzki, L; Stone, TW; (-); Szulc, A
Apr 20 2021 | Progress in Neuro-psychopharmacology & Biological Psychiatry
Despite the well-established roles of B-vitamins and their deficiencies in health and disease, there is growing evidence indicating a key role of those nutrients in functions of the central nervous system and in psychopathology. Clinical data indicate the substantial role of B-vitamins in various psychiatric disorders, including major depression, bipolar ... [Show more](#)

Fields included in a Topic Search

1

Title

All titles are indexed as published. Foreign language titles are translated into US English.

2

Abstract

All abstracts are indexed as provided by the journal (1991 to present).

3

Author Keywords

Author Keywords are indexed from the original article and are searchable.

4

KeyWords Plus

KeyWords Plus are words and phrases harvested from the titles of the cited articles.

Additional Fields

5

Author names

All authors are indexed. Search using last names and initials (e.g. Garfield e).

6

Author identifiers

Web of Science ResearcherIDs and ORCID IDs are searchable and displayed when available. Web of Science ResearcherIDs are associated with *Publons* profiles at publons.com. ORCID data is harvested from orcid.org.

7

Addresses and Affiliation names

All author addresses are indexed and searchable. Affiliation names are unified and used to help identify institutions with complex names, or with many address variations.

8

Funding Information

Funding agency, grant numbers, and the funding acknowledgement text is searchable (availability varies by index).

9

Journal Information

Journal citation performance data is sourced from Journal Citation Reports. It includes the Web of Science subject category or categories where the journal is placed, as well as rank in category and quartile in category performance. The Journal Impact Factor is displayed for those users whose organization has an active subscription to Journal Citation Reports.

10

Citation Network

- Cited References
- Times Cited Counts
- Related Record Search
- Citation Alerts

Times cited counts for the *Web of Science Core Collection* and the *Web of Science* platform (including *Web of Science Core Collection*, *Biosis Citation Index*, *Chinese Science Citation Database*, *Data Citation Index*, *Russian Science Citation Index* and *SciELO Citation Index*) are displayed on each record. Counts reflect all correct citations and are not limited by your subscription.

11

Cited References

All cited references are indexed and searchable via Cited Reference Search. Click the "Cited References" link in the Citation Network to move to the cited reference view.

12

Usage Count

See the number of full text click-throughs or bibliographic exports for this item in the last 180 days or since 2013.

Cited Reference Search

Step one

- Navigate to Cited Reference Search.
- Search by Cited Title, Cited Author, Cited Work, Cited Year, Volume, Issue, or Page.

Step two

Select the references, including variants, to include in your search, then click **See Results** to display your search results.

Cited reference search tips:

- Use wild card characters (see page 2) on Cited Authors and Cited Work.
- Look for variants (sometimes papers are cited incorrectly) before finishing your search.
- The “Citing Articles” count reflects citations from all years and all editions of the Web of Science Core Collection – even those years and editions you don’t subscribe to.
- All cited references are indexed and searchable, including references to books, patents, government documents, etc. Secondary cited authors, full source titles, and non-standard source abbreviations are automatically searched across all source records in the Web of Science. Keep in mind that a search of this sort may only return partial results.

Since 2012, all references to ‘non source’ items (books, newspaper items, etc.) are fully indexed (full list of authors, full title, etc.) as published. Click “Show Expanded Titles” to see the full reference information
